Letter of recommendation

I am writing this letter of recommendation for Elmira Hrachyan, a graduate of **IT Career Hub** programming school, who participated in an unpaid freelancing collaboration project (online, part-time) at our **Berlin-based Project** from the 12th of September 2024 to the 3ed of December 2024 as a Frontend Developer.

The main task at the collaboration was to prepare for MVP creation, Elmira helped with tasks on building the project's landing page.

During his time collaborating on the project with us, Elmira demonstrated a strong work ethic, attention to detail, and excellent problem-solving skills. In addition, Elmira was a valuable team player and showed great communication skills when working with others. She was always willing to do whatever it took to ensure the project's success.

In addition to her technical skills, Elmira is a quick learner and has a natural curiosity for new technologies. She also has excellent time management and organizational skills that have enabled her to juggle multiple deliverables simultaneously while maintaining a high level of quality in her work.

I do not doubt that Elmira would be an asset to any organization. She is a talented and dedicated tester with a passion for software development and a proven track record of success. I wholeheartedly recommend her for any role in this field.

Please do not hesitate to contact me if you have any further questions.

Yours sincerely,

Eile Bitar
